PNEUMATIC SYSTEM

LAMSON HAVE BEEN INVOLVED IN CASH HANDLING SYSTEMS FOR OVER 100 YEARS, WHY NOT ENSURE YOUR HARD EARNED CASH IS SENT TO A SAFE OR SECURE AREA ON A REGULAR BASIS AND DETER THE CRIMINAL ELEMENT AWAY.

VARIATIONS OF THE CASH TUBE SYSTEMS ARE ALSO AVAILABLE FOR OTHER USES AND ARE EXTENSIVELY USED FOR CARRYING LABORATORY SAMPLES OR PHARMACEUTICALS IN HOSPITALS, ALONG WITH MOVING A WIDE RANGE OF DOCUMENTS AND SAMPLES AROUND COMMERCIAL AND INDUSTRIAL AREAS.

LAMSON ARE AN AUSTRALIAN OWNED AND OPERATED COMPANY THAT HAVE BEEN IN BUSINESS FOR OVER 100 YEARS. WE HAVE IN HOUSE ENGINEERING STAFF, WHO CAN HELP WITH ALL NEEDS. LAMSON ARE ALSO PATENT HOLDERS OF CASHGUARD AND C.A.S.T. LAMSON ALSO HAVE A WORLD WIDE ISO 9001 CERTIFICATE.

VARIATIONS OF THE CASH TUBE SYSTEMS ARE ALSO AVAILABLE FOR OTHER USES AND ARE EXTENSIVELY USED FOR CARRYING LABORATORY SAMPLES OR PHARMACEUTICALS IN HOSPITALS, ALONG WITH MOVING A WIDE RANGE OF DOCUMENTS AND SAMPLES AROUND COMMERCIAL AND INDUSTRIAL AREAS.

TAKE CARE OF YOUR HARD EARNED CASH!
MAKE OPERATORS MORE ACCOUNTABLE VIA A PRINTABLE AUDIT TRAIL.

Although the use of Parachute Bags have been in the market place for some time, it is now, that major retailers have embraced the concept.

The Parachute Bag Revolution...

Here Is Why:

• Hundreds of cash filled bags can be sent either directly to a vacuum sealed safe or laminated receiving cabinet.
• As with any commodity that becomes mainstream, the price per bag is now very low.
• Compared to a hard carrier system a bag costs less.
• Bag systems don’t require a secondary system to return empty carriers.

And More Importantly:

• A bag system cost less to maintain.

However - if you wish, the Lamson 750 Series can also be made to be used with either hard or canvas carriers.

The Lamson 750 Series system has an array of other features, some of which are auditable alarms, time and date display, resetable transaction counter, In Queue and Please Wait indicators, Up to 274 operator P.I.N’s available, Service Mode, and also one send station which can recognise many cash register identities.

OPTIONAL WITH THE LAMSON 750 SERIES

Entry of a PIN - Personalised Identification Numbers, - Enables staff to move from register to register taking their cash drawer with them, the system can track where each operator has sent cash from. Each user or operator is issued with a PIN, Supervisors have 2, one as a user and one as a Supervisor that is used to correct operator errors and alarm faults. Each PIN operates with a user ID, which is a 4 digit alpha reference.

Entry of the Register No. - Enables accurate tracking of which register the operator sent the cash from.

Entry of $ amount - Any 3 or 4 digit amount.
Move your cash with complete security using the Lamson 750 Series system.

The 750 Series system was designed, developed and manufactured by Lamson with consultation between Lamson and National Retail Loss Prevention Managers. With the primary objective to make cashiers more accountable when performing a cash register clearance.

The Lamson 750 Series enables Management to monitor, trace and have printed documentation of who sent what, when, via a number of printable audit trails. This is achieved by each operator being issued with a Personalised Identification Number.

Following are just 2 examples of printouts that are available.

Auditing a PIN for either 1 day or 7 days:
Prints a PIN audit trail for the current day plus the previous day or seven days as required.

</tr>
</tbody>
</table>

NOTE: No reference is made to P.I.N numbers for confidentiality as they are linked to an ALPHA reference that can only be accessed by Management - e.g. KATT would be linked to 1234.

The Lamson 750 Series has a supervisors control panel located in the cash office or secure area. Some of its primary functions are:

- Adding and deleting P.I.N’s.
- Printing audit trails for 1 or 7 days with regard to either:
  1. The entire LOG - all entries.
  2. All P.I.N Numbers.
  3. Register Numbers.
  4. Station Numbers.
- Station Lockout - a particular station’s can be locked out whilst the remainder are operational.
