

HEALTHCARE SOLUTIONS  
PNEUMATIC TUBE SYSTEM  
TranspoNet SafeSeal Carrier

UNIQUE TWO-IN-ONE  
CARRIER:  
LEAK-RESISTANT AND  
SMART-OPEN

## UNIQUE TWO-IN-ONE CARRIER

# TRANSPONET SAFESEAL CARRIER INCREASES WORKFLOW EFFICIENCY AND SUPPORTS HIGH LEVEL OF HYGIENE

The SafeSeal carrier sets new standards with its extremely user-friendly opening, its leak-resistance, and its possible use in automated loading and unloading devices. The completely reengineered design was influenced by hospital personnel and their needs for easier and faster manual handling of the carrier.

## BENEFITS

### Increase workflow efficiency

The SafeSeal carrier features an integrated handle for effortless opening, providing intuitive and user-friendly handling and improving turnaround times.

### Track and trace transports

The SafeSeal carrier is equipped with RFID transponders to identify, track, and trace it in real time in a pneumatic tube system.

### Minimize risk of contamination

The lids of the SafeSeal carrier are equipped with leak-resistant seals to prevent leaks or spills of liquids from the carrier during transport. Therefore, the SafeSeal carrier can handle potentially infectious substances, minimizing the risks of contamination in the pneumatic tube system network running through the hospital and providing increased safety for patients, personnel, and visitors.

### Shape the future

Both lids of the SafeSeal carrier are equipped with a slot for a release pin for use in automated devices. It enables loading and unloading of the carrier without manual handling and opens up endless possibilities for time- and cost-efficient applications in hospital pharmacies and in laboratories with high analyses output.

## AT A GLANCE

- User-friendly and ergonomic
- Leak-resistant
- Smart-open for use in automated loading and unloading devices
- Automated and manual handling
- Track and trace
